

1invest SA Bond ETF

Fund information update at 30 November 2019

What is the fund's objective?

The objective of the 1invest SA Bond ETF is to track the S&P South Africa Sovereign Bond 1+ Year Index as closely as possible.

What does the fund invest in?

The fund invests in the constituents of the S&P South Africa Sovereign Bond 1+ Year Index and aims to replicate the Index by holding the same weightings of these constituents. The S&P South Africa Sovereign Bond 1+ Year Index seeks to track the performance of local currency denominated sovereign debt publicly issued by the government of South Africa in its domestic market, with maturities of one year or more. The fund is rebalanced quarterly and therefore has minimal trading costs. The fund may also hold a small portion in cash instruments and listed derivatives to effect efficient portfolio management.

What possible risks are associated with this fund?

Risks include default risk, interest rate risks, inflation risk, market volatility, economic and political risk.

What are the costs to invest in this fund?

Maximum charges including VAT

	Class A
Annual fee	0.288%
Performance fee	N/A

Annual fee – this is a service charge (% based) applicable to each class of a fund, that is levied on the value of your portfolio and includes the fund management fee and administration fee. The fee also includes other charges such as audit, custody and index provider fees that are normally additional permissible deductions. Annual fees are calculated and accrued daily and recovered monthly from the income awaiting distribution in the fund.

This portfolio is an exchange traded fund (ETF). The charges detailed above relate to the portfolio, they do not include the fees for trading on an exchange. Brokerage fees, which are payable when buying or selling an ETF on an exchange, are levied by a broker and may vary depending on the broker used.

Cost ratios (annual) including VAT as at 30 June 2019

	Class A
Based on period from:	04/06/2019
Total Expense	0.24%
Transaction Costs	0.00%
Total Investment Charge	0.24%
1 Year Total Expense	0.24%

Total Expense (TER): This ratio shows the charges, levies and fees relating to the management of the portfolio and is expressed as a percentage of the average net asset value of the portfolio, calculated over the period shown and annualised to the most recently completed quarter. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER should not be regarded as an indication of future TERs.

Transaction Costs (TC): This ratio shows the percentage of the value of the fund incurred as costs relating to the buying and selling of the fund's underlying assets. TC are a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, investment decisions of the investment manager and the TER.

Total Investment Charges (TIC): This ratio is simply the sum of the TER and TC, showing the percentage of the value of the fund incurred as costs relating to the investment of the fund. It should be noted that performance figures account for all costs included in the TIC ratio, so you should not deduct the TIC from performance figures, the performance is already net of the TIC.

The TER, TC & TIC cannot be determined accurately for portfolios/portfolio classes that are not yet 1 year old because of the short life span of the portfolio/portfolio class. Calculations in this instance are based on actual data where possible and best estimates where actual data is not available.

Commentary

Fund review

The review of the S&P South Africa Sovereign Bond 1+ Year Index (SPFIZAA) in the last quarter saw no additions or deletions from the index. The fund performed in line with the Index. The R186 Government bond was the largest bond in the fund and its yield increased from 8.09% as at end of June to 8.29% as at end of September. The modified duration of the bond decreased from 5.28 as at end of June to 5.02 as at end of September. The yield of the fund increased from 8.94% to 9.12% over the quarter. The modified duration of the fund decreased from 7.26 to 7.20 over the quarter.

Market overview

Post a strong run of equity markets across the globe in the first half of 2019, global markets have since slowed down due to increased tension in the trade wars and continued slowdown in global economic data. Europe and USA continued with monetary easing to offset economic slowdown. Returns have hence been flat for the quarter apart from the emerging markets, with the MSCI World at 1.1% and MSCI EM at -2.1% for the quarter. Locally, GDP was 3.1% Q/Q in Q2 2019 reversing the Q1 2019 contraction, SARB cut rates by 25bps in line with census in their July meeting but left it unchanged in September. The national treasury published a white paper on structural reform including SOE reform, marking one of the first signs of structural reforms in the new Presidency. Locally, domestic asset classes such as equities (SWIX ALSI), bonds (ALBI), and cash (STeFi) recorded mixed returns of -2.14%, 1.5% and 1.8% respectively.

Looking ahead

Against the backdrop of slowing global economic growth, a pause in trade war, could provide some relief to the financial markets. But if trade uncertainty continues posing a significant drag on business and consumer confidence, we expect risk aversion will rise as the ability of developed markets and vulnerable emerging economies to weather the impact of trade wars remains uncertain. Additionally, emerging economies with sizeable dollar debts and fiscal deficits may struggle. Locally, uncertainty will remain high until the government provides evidence that SA's economic policy and reforms are heading in the right direction for future growth. We believe investors should focus on liquid markets segments with risk dialled down compared with market benchmarks.

Disclosures

Collective Investment Schemes in Securities (CIS) are generally medium to long term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to future performance. CIS are traded at ruling prices and can engage in borrowing and scrip lending.

The 1Invest SA Bond ETF is a portfolio of the STANLIB ETF Collective Investment Scheme (the Scheme).

The manager of the Scheme is STANLIB Collective Investments (RF) (Pty) Limited (the Manager). The Manager is authorised in terms of the Collective Investment Schemes Control Act, No. 45 of 2002 (CISCA) to administer Collective Investment Schemes (CIS) in Securities. Liberty is a full member of the Association for Savings and Investments of South Africa (ASISA). The Manager is a member of the Liberty Group of Companies. The manager has a right to close a portfolio to new investors in order to manage the portfolio more efficiently in accordance with its mandate. The Manager does not provide any guarantee either with respect to the capital or the return of a CIS portfolio. A schedule of fees and charges and maximum commissions is available on request from the Manager.

The trustee of the Scheme is Société Générale Johannesburg Branch.

The investments of this portfolio are managed, on behalf of the Manager, by 1INVEST Fund Managers (Pty) Ltd, an authorised financial services provider (FSP), FSP No. 49955, under the Financial Advisory and Intermediary Services Act (FAIS), Act No. 37 of 2002.

Prices are calculated and published on each working day, these prices are available on the Manager's website (www.stanlib.com) and in South African printed news media. This portfolio is valued at 17h00. Forward pricing is used.

This portfolio is an Exchange Traded Fund registered as a CIS (CIS-ETF), it is listed on an exchange and may therefore incur additional costs. Participatory interests in a CIS-ETF cannot be purchased directly from the Manager. A CIS-ETF is subject to exchange listing requirements and settlement cycles for equities and all trading in a CIS-ETF is through an exchange. It may take a few days longer to receive the proceeds of a sale of a CIS-ETF than would be the case for a CIS.

This is a portfolio that derives its income primarily from interest-bearing instruments. The yield (if shown) is a current effective yield calculated daily.

This portfolio is a third party named, incubator portfolio. The Manager retains full legal responsibility for this portfolio. A third party named, incubator portfolio is a portfolio bearing the name of the financial services provider (FSP), who intends to apply to the Registrar to be approved as a manager within three years after the Registrar has approved the portfolio, and where the FSP, under an agreement with the Manager, undertakes financial services of a discretionary nature, as contemplated in the Financial Advisory and Intermediary Services Act, Act No. 37 of 2002 (FAIS), in relation to the assets of the portfolio. 1INVEST Fund Managers (Pty) Ltd, an authorised FSP, FSP No. 49955, FAIS, is the third party manager of this portfolio.

The FSP is a related party to the Manager, the FSP may earn additional fees other than those charged by the Manager. It is the responsibility of the FSP to disclose additional fees to the investor. This document is not advice, as defined under FAIS. Please be advised that there may be representatives acting under supervision.

All performance returns and ranking figures quoted are shown in ZAR and are based on data sourced from Morningstar or Statpro and are as at 30 November 2019.

Annualised return figures are the compound annualised growth rate (CAGR) calculated from the cumulative return for the period being measured. These annualised returns provide an indication of the annual return achieved over the period had an investment been held for the entire period. Actual annual figures are available on request from the Manager.

Portfolio performance figures are calculated for the relevant class of the portfolio, for a lump sum investment, on a NAV-NAV basis, with income reinvested on the ex-dividend date. Individual investor performance may differ due to initial fees, actual investment date, date of reinvestment of income and dividend withholding tax. Portfolio performance accounts for all costs that contribute to the calculation of the cost ratios quoted, all returns quoted are after these costs have been accounted for.

Statistics - Positive Months: the number of individual 1 month periods during the specified time period where the return was not negative; Max Gain: the maximum gain in a trough-to-peak incline before a new trough is attained, quoted as the percentage between the trough and the peak. It is an indicator of upside risk over a specified time period (quoted for all periods of 1 year or longer); Max Drawdown: the maximum loss in a peak-to-trough decline before a new peak is attained, quoted as the percentage between the peak and the trough. It is an indicator of downside risk over a specified time period (quoted for all periods of 1 year or longer, where blank no loss was experienced); Highest and Lowest: the highest and the lowest 1 year return (%) that occurred during the specified time period (quoted for all relevant classes launched 1 year or more prior to current month end date).
