

# SUNSTRIKE CAPITAL

## UNLOCKING WEALTH

Each investor owns a fully segregated portfolio which is individually managed by us. The performance and TER are calculated based on an aggregation of all the portfolios in this product. The performance and TER thus act as a guide for each portfolio. Individual portfolios may vary due to the impact of individual investment sizes and timing.

### Investment objective

To provide the investor with an opportunity to invest in a tax efficient, high growth and very long term savings vehicle with maximum allowable equity exposure under Regulation 28.

This investment vehicle complies with Regulation 28 of the Pension Funds Act of 1956.

### Investment strategy

This portfolio is part of a suite of discretionary managed personal portfolio products, which track the market by investing in a range of index based Exchange Traded Funds (ETFs). Sunstrike Capital uses an algorithm, rather than human intuition, to select and allocate each client's portfolio of ETFs. These ETFs represent domestic money, bonds, property, equity and offshore equity. ETFs are picked using a method which selects a small set of the most efficient and most diverse ETFs. Capital is then allocated to each of these ETFs to create five risk banded portfolio products. These portfolio products provide broad, diversified, multi-asset-class, market exposure.

The risk designations below suggest approximate investment horizons. The investment horizon and risk band of this portfolio is highlighted by a red box.

Risk Band	Horizon (years)
