

# SUNSTRIKE CAPITAL

## UNLOCKING WEALTH

# Itransact Conservative Savings ETF Portfolio

August 2017

Each investor owns a fully segregated portfolio which is individually managed by us. The performance and TER are calculated based on an aggregation of all the portfolios in this product. The performance and TER thus act as a guide for each portfolio. Individual portfolios may vary due to the impact of individual investment sizes and timing.

## Investment objective

To provide the risk-averse investor with a low-risk vehicle which conservatively grows capital during times of caution or when the goal is short term savings and unnecessary risk cannot be tolerated.

## Portfolio information

|                                  |                                    |

| Distributions                    | Reinvested                         |

## Investment strategy

This portfolio is part of a suite of discretionary managed personal portfolio products, which track the market by investing in a range of index based Exchange Traded Funds (ETFs). Sunstrike Capital uses an algorithm, rather than human intuition, to select and allocate each client's portfolio of ETFs. These ETFs represent domestic money, bonds, property, equity and offshore equity. ETFs are picked using a method which selects a small set of the most efficient and most diverse ETFs. Capital is then allocated to each of these ETFs to create five risk banded portfolio products. These portfolio products provide broad, diversified, multi-asset-class, market exposure.

The risk designations below suggest approximate investment horizons. The investment horizon and risk band of this portfolio is highlighted by a red box.

| Risk Band                          | Horizon (years) |
|------------------------------------|-----------------|
| Conservative                       | 1 - 3           |
| Cautious                           | 3 - 6           |
| Moderate                           | 6 - 8           |
| Growth                             | 8 - 11          |
| Aggressive (or Maximum for the RA) | 11+             |

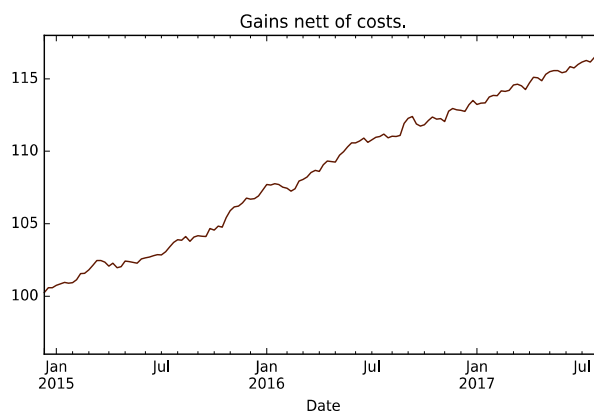

## Asset allocation

| Instrument Name   | % Weighting |
|-------------------|-------------|
| TRACI 3 Month ETF | 72.4        |
| NewFunds ILBI ETF | 17.0        |
| DBX USA ETF       | 10.2        |

| Asset Class | Domicile | % Weighting |
|-------------|----------|-------------|
| Money       | Domestic | 72.4        |
| Bond        | Domestic | 17.0        |
| Equity      | Foreign  | 10.2        |

## Performance

The graph represents an initial investment of one hundred (100) Rand and the evolution of that investment value over time up to the present.<sup>2</sup>

| Period Invested              | % Annual Return | % Annual Volatility |
|------------------------------|-----------------|---------------------|
| Since inception (2014-12-11) | 6.08            | 1.33                |
| 2 Year Performance           | 6.05            | 1.31                |
| 1 Year Performance           | 5.32            | 1.23                |

## Risk measures (since inception)

|                             |      |
|-----------------------------|------|
| Highest 12-month return (%) | 7.84 |
| Lowest 12-month return (%)  | 4.63 |

## Suitability of this investment plan

This portfolio product is suitable to those who:

- Are risk intolerant yet seek returns that are better than cash.
- Are currently cautious about being significantly exposed to equity markets.
- Require a short term savings vehicle.
- Want investment fees and charges to remain as low as possible.

## Fees

Sunstrike Capital (Pty) Ltd charges a fixed annual portfolio management fee of 0.15% which is calculated daily based on the market value of the portfolio and deducted quarterly. This fee is included in the Total Expense Ratio.

## How to invest

Sunstrike Capital (Pty) Ltd firmly believes in the value of impartial, independent financial advice and only distributes this portfolio product through authorised financial service providers. Ask your financial advisor how our low cost retirement and savings portfolios will give you the best chance of achieving your retirement goals. They will provide advice and expertise, and will also facilitate your application and manage the paperwork.

<sup>1</sup> The TER includes investment management fee, brokerage fees, settlement costs, statutory costs and VAT.

<sup>2</sup> The performance shown is net of all The Manager's total expenses and fees for running the portfolios as well as net of all the expenses and fees of the underlying ETFs. The performance is not net of any platform or any IFA expenses and fees.

---

## **Online support**

## Disclaimer

Sunstrike Capital (Pty) Ltd (Reg No 2011/004440/07 ) (License number 44691) (trading as Index Solutions) is a licensed discretionary financial service provider. Sunstrike Capital (Pty) Ltd is incorporated under the laws of South Africa and is supervised by the Financial Services Board. This document and any other information supplied in connection with Sunstrike Capital (Pty) Ltd is not “advice” as defined and/or contemplated in terms of the Financial Advisory and Intermediary Services Act, 37 of 2002 (“the FAIS Act”) and investors are encouraged to obtain their own independent advice prior to investing in any product issued by Sunstrike Capital (Pty) Ltd . All information herein is deemed correct at the publication date. Trading in listed securities will incur the normal costs associated with listed securities, including brokerage, settlement costs, Securities Tax (“STT”), other statutory costs and administrative costs. Investing in listed securities involves financial risk and the value of an individual portfolio may go down as well as up and past performance is not generally a guide to future performance. This Minimum Disclosure Document is provided for illustrative purposes only. Investors must take cognisance of the fact that all the information provided is of historic nature. The Manager reserves its right as a discretionary financial services provider to change the asset allocation weightings of the portfolios from time to time in keeping with its fiduciary duty with regard to keeping the portfolios aligned with their risk profile, mandate and investment strategy, under changing market conditions, which may result in certain listed securities (especially with smaller weightings) being dropped from the portfolios at times, and certain new listed securities to be incorporated into the portfolios from time to time.
