CODES	JSE	ISIN
Class A	OMFA	ZAE000135810
Class B1	OMAB1	ZAE000179271

FUND OBJECTIVE

The fund aims to offer investors an ethical investment that provides steady, long-term capital growth, as well as a moderate level of income via a portfolio that diversifies across asset classes and regional exposure. The Shari'ah Supervisory Board oversees adherence to the applicable Shari'ah principles. This fund specifically adheres to the standards of the Accounting and Auditing Organisation for Islamic Financial Institutions (AAOIFI) as interpreted by the Shari'ah Supervisory Board.

WHO IS THIS FUND FOR?

This fund is suited to investors wanting moderate to high long-term growth from their Shari'ah compliant investment, with less volatility in the short term than pure equity. It is suitable as a stand-alone retirement investment.

NON-PERMISSIBLE INCOME

Incidental income deemed to be non-permissible is paid to the charitable trust elected by the Shari'ah Supervisory Board (SSB) in line with the principles of Shari'ah and the supplemental deed of the fund. Non-permissible income does not form part of the investor's income.

For the avoidance of doubt, the duty of the Old Mutual Unit Trust Company (OMUT), Old Mutual Investment Group (OMIG) and the SSB to ensure Shariah compliance arises only upon receipt of monies into the fund. Neither OMUT, OMIG nor the SSB shall bear any liability for how the monies were held or managed prior to such receipt.

INVESTMENT MANDATE

The fund is a Shari'ah compliant asset allocation fund that offers investors access to local and international asset classes including equity, liquid assets and non-equity securities, such as sukuks (Islamic bonds) and equity conduits. It may also invest in the portfolios of other unit trusts, both locally and those registered in countries with acceptable regulatory environments. This fund may invest up to 45% (including Africa) of its portfolio offshore.

REGULATION 28 COMPLIANCE

The fund complies with retirement fund legislation. It is therefore suitable as a stand-alone fund in retirement products where Regulation 28 compliance is specifically required.

- 19 years of investment experience

The Middle East war and its inflation fallout dominated the quarter. Brent crude returned above US$100 a barrel, European gas stayed above €70/MWh for most of September, and Washington announced a fresh wave of tariffs. A global bond sell-off intensified through the quarter as oil, hawkish central banks and heavy government issuance collided. The US 10-year Treasury yield rose from about 4.4% at the start of the quarter to 5.27% at its peak, its highest level since 2007. Bond yields around the world rose: 10-year yields in Japan, Germany and the UK reached their highest levels since 1996, 2011 and 2007 respectively. Central bank policy turned decisively hawkish. The US Federal Reserve (Fed) held in July but hiked by 25 basis points to 3.75%-4% in September, a unanimous decision and the first hike under new Fed Chair Kevin Warsh. The Bank of Japan and the European Central Bank also hiked rates, while the Bank of England held at 3.75%. The South African Reserve Bank (SARB) raised its repo rate to 7.25%, citing inflation above its 3% target, rising global rates and intensifying oil price pressure.

Despite rising long-dated bond yields and hawkish central banks, global equities remained buoyant, supported by resilient earnings. In rand terms, they returned 1.7% over the quarter, outperforming global bonds (-2.4%), local equities (-0.3%) and local bonds (-0.7%). Within local asset classes, cash and inflation-linked bonds outperformed local bonds and equities. Local equities fell marginally over the quarter, but this masked considerable volatility, especially in mining shares. Precious metal miners rallied strongly in August on higher gold and platinum prices, then fell sharply in September. Outside the resource sector, weakness was broad-based, with index heavyweight Naspers falling sharply on weakness in Tencent. The rand and bonds weakened during the quarter as rising global yields and oil prices took their toll with the South African 10-year bond yield rising from 8.4% to 9% over the quarter.

In absolute terms, every major building block added to the fund's return. Local equities contributed 0.74%, global equities 0.67%, and Sukuk and Islamic money market instruments together 0.83%.

The quarter was mixed. After a modest July, August was strong and September gave back ground as local equities sold off, particularly mining shares. Importantly, global equities held up while the local equity portfolio fell.

Within local equities, resource shares led for the quarter: South32, Anglo American, BHP, Harmony Gold, AngloGold Ashanti and Sasol contributed most. MTN, Kumba Iron Ore, Richemont, AECI and Exxaro detracted. In September, Gold Fields, BHP and Richemont fell sharply as precious metal miners reversed their August rally.

Global equities returned 3.2% in rand terms. Microsoft, Nvidia, Apple, Meta and Recruit Holdings were the leading contributors, while semiconductor names such as Applied Materials and Lam Research detracted.

The Sukuk book yields 8.1% with a modified duration of 1.76 (1.6 last quarter). A few Sukuk matured during the quarter and were reinvested at higher rates. We continue to favour medium-to-longer-duration Sukuk to lock in attractive yields while managing reinvestment risk in case the South African Reserve Bank's (SARB) tightening proves temporary.

The local equity portfolio is run systematically with quality, value, and growth tilt. Materials make up about 54% of it, led by BHP, Anglo American, Gold Fields, South32 and Harmony Gold. Consumer discretionary (about 16%, including Richemont), communication services (about 10%, including MTN) and consumer staples (about 9%) make up most of the rest.

The global portfolio holds about 75 stocks and follows the same systematic process, tilting towards quality, value and growth. IT is the largest sector, followed by consumer discretionary, communication services and industrials. The US is about 74% of the portfolio, Japan 8% and South Korea 5%.

Oil, inflation and the SARB's next move are the main risks, along with global bond yields.

The fund draws returns from three sources that do not move together. In September, local equities fell sharply, yet global equities and Sukuk income limited the decline in the fund. The Sukuk book anchors returns, equity exposure is bound by the 60% mandate limit, and both equity portfolios follow a disciplined systematic process. Every holding is approved by the Shari'ah Board, and there were no disinvestments for non-compliance this quarter.

OTHER INVESTMENT CONSIDERATIONS

ONGOING

	Class A	Class B1
Annual service fees (excl. VAT)	1.25%	1.00%

Please note: Class B1 is available through investment platforms such as Old Mutual Wealth.

The fee is accrued daily and paid to the management company on a monthly basis. Other charges incurred by the fund, and deducted from its portfolio, are included in the TER. A portion of Old Mutual Unit Trusts' annual service fees may be paid to administration platforms..

	36 Months		12 Months	
Total Expenses (Incl. Annual Service Fee) (30/06/2026)	Class A	Class B1	Class A	Class B1
Total Expense Ratio (TER) Incl. VAT	1.46%	1.17%	1.46%	1.17%
Transaction Cost (TC)	0.11%	0.11%	0.11%	0.11%
Total Investment Charge	1.57%	1.28%	1.57%	1.28%

Please note: Class B1 is available through investment platforms such as Old Mutual Wealth.

TER is a historic measure of the impact the deduction of management and operating costs has on a fund's value. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER, which includes the annual service fee, may not necessarily be an accurate indication of future TERs. Transaction Cost (TC) is a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

MINIMUM INVESTMENTS

LOW BALANCE CHARGE

Effective from 31 March 2025, a Prescribed Minimum Balance of R10 000 per fund per investment contract will apply. Failure to maintain the Prescribed Minimum Balance in any such fund will result in a Low Balance Charge* of R31 per month excluding VAT being incurred. However, if there is an existing monthly debit order of a minimum of R500 into each underlying fund within your investment contract, the Low Balance Charge will not apply. Please refer to the link for a full disclosure on how the Low Balance Charge will apply to your investments.

* This charge will not apply if investing via investment platforms such as Old Mutual Wealth.

INITIAL CHARGES (Excl. VAT):

Initial adviser fee will be between 0% and 3.00%.

DISCLOSURES

We aim to treat our clients fairly by giving you the information you need in as simple a way as possible, to enable you to make informed decisions about your investments.

- We believe in the value of sound advice and so recommend that you consult a financial planner before buying or selling unit trusts. You may, however, buy and sell without the help of a financial planner. If you do use a planner, we remind you that they are entitled to certain negotiable planner fees or commissions.
- Investments in unit trusts should ideally be a medium- to long-term strategy that takes cognisance of the Recommended Investment Term of each individual fund as stipulated in its Minimum Disclosure Document. A fund's or an investment strategy's ability to provide benchmark performance, or to achieve its performance target over its Recommended Investment Term on a net of fee basis may be impacted by market illiquidity, differences in fund and market pricing points, concentration risk and other local (and where applicable global) events, such as market- and political developments, macro-economic factors and healthcare risks such as Covid-19, amongst others. Your fund value may therefore go up or down and the investment capital or return on your investment is not guaranteed. How a fund has performed in the past does not necessarily indicate how it will perform in the future.
- The fund fees and costs that we charge for managing your investment are disclosed in this Minimum Disclosure Document (MDD) and in the table of fees and charges, both of which are available on our public website or from our contact centre.
- Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained, free of charge, from Old Mutual Unit Trust Managers (RF) (Pty) Ltd, from our public website at www.oldmutualinvest.com or our contact centre on 0860 234 234.
- Our cut-off time for client instructions (e.g. buying and selling) is at 15:00 each working day for all our funds, except for our money market funds, where the cut-off is at 12:30.
- The valuation time is set at 15:00 each working day for all our funds, excluding our money market funds which is at 13:00, to determine the daily ruling price (other than at month-end when we value the Old Mutual Index Funds and Multi-Managed Fund of Funds range at 17:00 close). Daily prices are available on the public website and in the media.
- Unit trusts are traded at ruling prices, may borrow to fund client disinvestments and may engage in scrip lending. The daily ruling price is based on the current market value of the fund's assets plus income minus expenses (NAV of the portfolio) divided by the number of units on issue.
- Excessive daily withdrawals from the fund may place the fund under liquidity pressures. In such circumstances a process of ring-fencing of withdrawal instructions and/or managed payouts over time may be followed.
- This fund holds assets in foreign countries and therefore it may have risks regarding liquidity, the repatriation of funds, political and macroeconomic situations, foreign exchange, tax, settlement, and the availability of information.
- The Net Asset Value to Net Asset Value figures are used for the performance calculations. The performance quoted is for a lump sum investment. The performance calculation includes income distributions prior to the deduction of taxes and distributions are reinvested on the ex-dividend date. Performances may differ as a result of actual initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Annualised returns are the weighted average compound growth rates over the performance period measured. Performances are in ZAR and as at 30 September 2026. Sources: Morningstar and Old Mutual Investment Group.

Old Mutual Investment Group (Pty) Ltd (FSP 604) is a Licensed Financial Services Provider. www.oldmutualinvest.com

Old Mutual Unit Trust Managers (RF) (Pty) Ltd, registration number 1965 008 47107, is a registered manager in terms of the Collective Investment Schemes Control Act 45 of 2002. Old Mutual is a member of the Association for Savings and Investment South Africa (ASISA). Old Mutual Unit Trust Managers has the right to close the portfolio to new investors in order to manage it more efficiently in accordance with its mandate.
