# **FNB GOVERNMENT** INFLATION LINKED BOND ETF

Minimum Disclosure Document as at 28 February 2025. The MDD covers the purposes of providing a general investor report

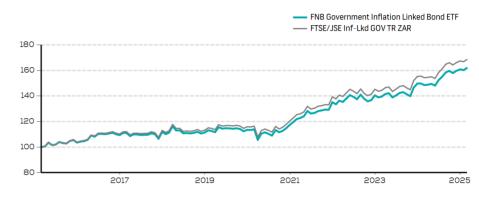

#### Investor profile

The FNB Government Inflation Linked Bond ETF is suitable for investors seeking a cost efficient, convenient investment with exposure to a diversified portfolio of government inflation–linked bonds. The fund offers quarterly distributions with no prescribed fixed investment period. The fund can also act as a building block for investors to use when constructing their own portfolios.

#### Investment objectives and strategy

To provide investors with a real rate of return above inflation (CPI), through exposure to a diversified portfolio of government inflation-linked bonds. The FNB Government Inflation Linked Bond ETF invests in bonds based on the value issued by National Treasury and the listed value on the JSE. The FNB Government Inflation Linked Bond ETF value issued by National Treasury and the listed value on the JSE. The FNB Government Inflation Linked Bond ETF aims to track the performance of the FTSE/JSE IGOV Index. The IGOV is a weighted basket of South African government inflation-linked bonds. The ETF tracks the component bonds of the index in proportion to the index weightings. The ETF looks to pay quarterly distributions to investors based on the coupons recieved withing the fund. The fund has exposure to government bonds, and risks include, but not limited to; default risk, interest rate risk, inflation risk, market volatility, economic and political risk. \*\*Effective 1 July 2020 the benchmark (GILBx) was replaced with the FTSE/JSE IGOV Index.

#### Cumulative return for 10 years

All performance numbers are net of all fees and expenses. The above is purely for illustrative purposes. The above portfolio performance is calculated on a NAV basis and does not take any initial fees into account. For reinvesting funds, income is reinvested on reinvestment date. Actual investment performance will differ based on the initial fees applicable, the actual investment date, the date of reinvestment of income and dividend withholding tax. Past performance is not necessarily an indication of future performance.

Standard Deviation:       The deviation of the return of the portfolio relative to its average.         Drawdown:       The greatest peak to trough loss until a new peak is reached.	Vanagement fee :	A management fee is a charge levied by an investment manager for overseeing an investment fund.
Irracking error:applicable).Total investment charges (TIC):It is the sum of the Total Expense Ratio (TER) and the Transaction Cost (TC).Highest & Lowest Return:The highest and lowest rolling twelve-month performance of the portfolio since inception.Sharpe Ratio:The ratio of excess return over the risk-free rate divided by the total volatility of the portfolio.Sortino Ratio:The ratio of excess return over the risk-free rate divided by the downside deviation of the portfolio.Standard Deviation:The deviation of the return of the portfolio relative to its average.Drawdown:The greatest peak to trough loss until a new peak is reached.	Performance fee :	A performance fee is a payment made to an investment manager for generating positive returns. This is as opposed to a management fee, which is charged without regard to returns.
charges (TIC):       It is the sum of the Total Expense Ratio (TER) and the Transaction Cost (TC).         Highest & Lowest Return:       The highest and lowest rolling twelve-month performance of the portfolio since inception.         Sharpe Ratio:       The ratio of excess return over the risk-free rate divided by the total volatility of the portfolio.         Sortino Ratio:       The ratio of excess return over the risk-free rate divided by the downside deviation of the portfolio.         Standard Deviation:       The deviation of the return of the portfolio relative to its average.         Drawdown:       The greatest peak to trough loss until a new peak is reached.	Fracking error:	0
Return:         In a highest and lowest rolling twelve-month performance of the portfolio since inception.           Sharpe Ratio:         The ratio of excess return over the risk-free rate divided by the total volatility of the portfolio.           Sortino Ratio:         The ratio of excess return over the risk-free rate divided by the downside deviation of the portfolio.           Standard Deviation:         The deviation of the return of the portfolio relative to its average.           Drawdown:         The greatest peak to trough loss until a new peak is reached.		It is the sum of the Total Expense Ratio (TER) and the Transaction Cost (TC).
Sortino Ratio:         The ratio of excess return over the risk-free rate divided by the downside deviation of the portfolio.           Standard Deviation:         The deviation of the return of the portfolio relative to its average.           Drawdown:         The greatest peak to trough loss until a new peak is reached.		The highest and lowest rolling twelve-month performance of the portfolio since inception.
Standard Deviation:       The deviation of the return of the portfolio relative to its average.         Drawdown:       The greatest peak to trough loss until a new peak is reached.	Sharpe Ratio:	The ratio of excess return over the risk-free rate divided by the total volatility of the portfolio.
Drawdown: The greatest peak to trough loss until a new peak is reached.	Sortino Ratio:	The ratio of excess return over the risk-free rate divided by the downside deviation of the portfolio.
0	Standard Deviation:	The deviation of the return of the portfolio relative to its average.
nformation ratio : The information ratio measures the risk-adjusted performance of a portfolio relative to a benchmark.	)rawdown:	The greatest peak to trough loss until a new peak is reached.
	Information ratio :	The information ratio measures the risk-adjusted performance of a portfolio relative to a benchmark.
