Advantages of Trading the ETF

Diversification: By buying one unit, you buy into several stocks in Africa at once, spreading your risk.

Cloud Atlas ETFs are listed on the JSE, and operate as a Collective Investment Scheme. Creating a safe and regulated environment for you investment to flourish.

The ETF is Inward listed, meaning a local individual investor can gain exposure into the fund without needing the Reserve Bank approval. Institutional investors can invest in this fund and it falls into the Regulation 28 Africa allocation.

Applying passive management helps save time and work on the part of the investor.

Risks associated with trading this ETF

The ETF provider is not responsible for price movements in the stock market.

Because the fund invests outside South Africa but calculated in Rands, exchange rates movements may adversely affect its value and performance.

Cloud Atlas works with service providers whose actions may also affect the fund's operations.

When a client sells ETF units and it is greater than, or equal to a basket size, Cloud Atlas will sell, in accordance to the index weightings, and repatriate the proceeds back to South Africa to pay the investor and cancel the ETF units. Where repatriation is delayed due to FX restrictions in a particular market, Cloud Atlas will move the sale proceeds of the underlying market to a separate Trust account for the care of the investor. The funds will, by default, be held in this account until they are able to be repatriated to South Africa.

Disclaimer

Cloud Atlas (RF) (Registration number 2013/078096/07) is a registered Collective Investment Scheme, supervised by the Financial Services Board. Collective investment schemes (CIS) are generally medium to long-term investments. The value of participatory interests or the investment may go down as well as up, past performance is not necessarily a guide to future performance. Collective investment schemes are traded at ruling prices and can engage in borrowing and scrip lending. The Manager does not provide any guarantee, either with respect to the capital or with respect to the return of a portfolio. Prices will be published daily on the Johannesburg Stock Exchange and are made available on our website. The portfolios are valued, in the primary market, at 17h00 (CAT) on the pricing date (business days), and with the Trustee's consent, valuations may take place more frequently, and the transaction cut-off time is 10h00 on each pricing date (business days). Foreign securities within portfolios may have additional material risks, depending on the specific risks affecting that country, such as: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks; and potential limitations on the availability of market information. Investors are reminded that an investment in a currency other than their own may expose them to a foreign exchange risk. The exchange traded fund is listed on an exchange and may incur additional costs. The ETF is more publicly tradable and information on the performance of the portfolio is easily obtained. An investor can view the index and its performance, as tracked by the exchange traded fund, on our website. The tracking error of the exchange traded funds cannot exceed 2.5% p.a. You can obtain additional information on the proposed investment, free of charge, from brochures, application forms and the annual report and any half-yearly report, which are available on our website: <https://www.cloudatlasinvesting.com/ami-real-estate-ex-sa-etf>.
