 The past portfolio performance is calculated on a rolling monthly basis, lump sum, NAV to NAV and distributions reinvested. Annualised return is weighted average compound growth rate over period measured. The investor performance may differ as a result of advisor fees (where applicable), actual investment date, date of reinvestment and dividend withholding tax. Past performance is not necessarily a guide to future performance. The lowest and highest returns show the lowest and highest consecutive 12 month return experienced since inception.
 Please note that this portfolio invests in markets which keep different trading hours to South Africa which would affect pricing of currencies as well as that of the underlying instruments held in the portfolio.
 Accordingly the return profile of the portfolio, which is priced in Rands at a point in time may differ to the official index return, in part, due to these reasons. (Tracking error: 2.20%)

DIFFERENCE BETWEEN ETFs AND UNIT TRUSTS

ETFs and Unit Trusts are both CISA portfolios and therefore they are regulated by the Financial Services Board – however ETFs are listed on the JSE and are therefore also regulated by the JSE. ETFs and Unit Trusts may seem similar in nature as they both hold a basket of shares but there are many differences between the two.

The differences not only lie within the investment approach but also:

- Trading – ETFs are listed on the JSE
- Transparency – You know exactly what shares the ETF holds
- Fees and minimum investment differs between the funds
- ETFs take a passively managed approach whereas active Unit Trusts focus more on an active strategy
