About 10X

10X Investments began investing money in 2007 and currently has R55.6 billion under management. We manage a range of investments from pensions to discretionary investments.

10X Index Fund Managers has been authorised since 2018 as a manager of Collective Investment Schemes.

About the fund

The investment objective of the portfolio shall be to track the S&P Global Dividend Aristocrats Blend Index (Custom) as closely as possible. The index is designed to simulate a portfolio of S&P regional Dividend Aristocrats underlying indices with an allocation representing regionally neutral exposure to the included countries as they appear in the S&P Global LargeMidCap Index (a comprehensive index that measures the performance of global equity markets). The included regions are Canada, Europe, Pan Asia and the United States. The Fund offers exposure to high quality companies with a long history of paying stable and increasing dividends.

How to Invest?

10X Global Dividend Aristocrats ETF is listed on the JSE Limited which means it can be bought or sold just like shares, throughout the day, through any authorised individual or any online platform. i.e Stock Brokers and Online Share Trading platforms.

Total Expense Ratio (TER): Expenses related to the administration of the Financial Product including Management Fees (MF) and Other Costs (OC). A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. The TER and Transaction Costs cannot be determined accurately because of the short life span of the Financial Product. Calculations are based on actual data where possible and best estimates where actual data is not available. The TER of this class of participatory interest / portfolio will be higher than the quoted service charge of the manager. These include audit, custody, trustee, management fees and VAT.

Transaction Costs: Transaction Costs are a necessary cost in administering the Financial Product and impacts Financial Product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Financial Product, the investment decisions of the investment manager and the TER. These costs include settlement fees and trading commissions.

Total Investment Charges (TIC): Transaction costs are a necessary cost in administering the Financial Product and impacts Financial Product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Financial Product, the investment decisions of the investment manager and the TER.

This is a minimum disclosure document. Collective Investment Schemes are generally medium to long term investments. The value of participatory interests may go down as well as up. The manager does not provide any guarantee either with respect to the capital or the return of a portfolio. Past performance is not necessarily an indication of future performance. CIS's are traded at ruling prices and can engage in borrowing and scrip lending. Different classes of units apply to these portfolios and are subject to different fees and charges. A schedule of fees and charges and maximum commissions is available on request from the manager. The manager has a right to close portfolios to new investors in order to manage them more efficiently in accordance with their mandates. Forward pricing is used. The manager may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. Income is re-invested on the re-investment date. Actual investment performance will differ based on the fees applicable, the actual investment date and the date of reinvestment of income. Dealing prices are calculated on a net instrument value and auditor's fees, bank charges and trustee fees are levied against the portfolios. Performance is calculated for the portfolio, and individual investor performance may differ as a result of fees, the actual investment date, the date of reinvestment and dividend withholding tax. Income distributions are included in the performance calculations prior to deduction of applicable taxes. Performance numbers and graphs are sourced from 10X Investments (Pty) Ltd and 10X Index Fund Managers (RF) (Pty) Ltd. NAV to NAV figures have been used. The investment performance is for illustrative purposes only. The investment performance is calculated after taking all ongoing fees into account. There are no initial fees or performance fees. The reinvestment of income is calculated on the actual amount distributed per participatory interest by using the ex-dividend date NAV price of the applicable class of the portfolio, irrespective of the actual reinvestment date. Risk profile of the fund ranges from low risk to high risk with a low risk potentially associated with lower rewards and a high risk with potentially higher rewards. Foreign securities may be included in the portfolio from time to time and as such may result in the following: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks and potential limitations on the availability of market information. The daily cut off time is 14:00 for trades and the valuation point is 17:00. Prices are published on Fintswitch by 10:00 daily. 10X Index Fund Managers (RF) (Pty) Ltd is registered as a Collective Investment Scheme Manager in terms of Section 5 of the Collective Investment Schemes Control Act. 10X Investments (Pty) Ltd is a member of ASISA.
