## About the Investment

### Investment objective(s)

The Investment is a five-year, ZAR, 100% capital-protected investment linked to an Index that tracks the performance of a global multi-asset portfolio. The Investment is linked to the BNP Paribas Multi-Asset Global Diversified Index (the 'Index').

### After five years, you will receive back:

- Your investment amount will always be 100% protected at maturity.
- After five years, if the Index return is positive, investors will receive their full Investment Amount back plus minimum predetermined participation (see investment schedule) in any Index growth. If the Index return is negative, the investor receives only full of the initial Investment Amount back.
- The index returns are further enhanced by USD/ZAR exchange rate at maturity.

### Currency risk

The index is quoted in USD. Your investment is in ZAR and any positive index performance is exposed to the ZAR/USD exchange rate over the investment term. This investment does not utilise any of your individual foreign exchange allowances.

### Capital Protection

After five years, if the Index return is positive, investors will receive their full Investment Amount back plus at least 635% participation in any Index growth. If the Index return is negative, investors will receive 100% of their invested capital back.

### Participation Rate (PR)

The Participation Rate will be determined on the Investment Start Date and will be at least the percentage quoted above. If it is below the Investment will not go ahead and you will receive your Investment Amount plus interest back.

### The Index

The Index to which the Investment is linked to the BNP Paribas Multi-Asset Global Diversified Index (BNPIMCD5 Index) (the 'Index'). The Index fact sheet can be found on our website or ask your financial adviser to provide you with a copy.

## Index Performance Calculation

### Initial Index Level (i)

The level of the Index on the Investment Start Date at the valuation time as determined by the calculating agent, that is, BNP Paribas.

### Final Index Level (f)

The arithmetic average of seven monthly levels of the Index will be taken over the last seven months of the Investment term, at Valuation Times as determined by the Calculation Agent. These dates will be available on the term sheet posttrade and will be made available to investors upon request.

### Index Performance (IP)

$$IP = (f-i)/i$$

### Valuation Time

The time at which the official closing level of an index is calculated and published.

## Final Redemption Amount

### Final Redemption Amount calculation:

$$FRA = \text{Investment Amount} \times (100\% + PR \times \text{MAX}[0\%; IP] \times FX)$$

PR=Participation Rate

IP=Index Performance

FX=Foreign Exchange Rate

## Other important information

### Early Redemptions

Please note that any early withdrawals (prior to the investment final maturity date) will be done at the prevailing market value of the Investment and any such early withdrawal could result in you losing some of your money. In terms of the policy, you may access a portion of your investment once during the term of five years. If you need to access your money, please refer to the policy terms and conditions and contact the administrator who will request the issuer to redeem the investment linked to your policy at the prevailing market value.

### Tax implications of the product

Generally speaking, the long term insurer is subject to tax on the growth and maturity of this policy. The tax incurred by the long term insurer will be deducted from the policyholder's investment before payout. A long term insurer is required to maintain five separate funds, of which four are liable for tax. Each of the four tax paying funds is subject to specific income tax and capital gains tax rates.

Any amendment to the tax legislation relating to long term insurers may affect the surrender value or maturity value of this policy. Should this occur, Absa Life Limited will contact you. Please obtain your own tax advice, relevant to your circumstances, prior to investing

### Cooling-off Period

You have a 37- (thirty seven) calendar day cooling-off period (the "Cooling-off Period") from investment start date in which to change your mind about your Investment.

If you change your mind within this period, we will sell the at market value and pay you this plus any financial adviser fees that have been included in the cost of the Investment. This value may be lower than your initial Investment Amount.

If you surrender your Investment after the Cooling-off Period, we will sell the instruments and pay you the current market value. This will be seen as an Early Redemption – see section above.
