About the Investment

Investment objective(s)

On maturity, you will receive back your full investment amount, plus enhanced participation in any positive index performance.

Your investment amount will always be 100% protected on maturity.

Currency risk

The index is quoted in USD. Your investment is in ZAR and any positive index performance is not exposed to the ZAR/USD exchange rate over the investment term. You therefore have no currency risk with this investment.

Capital Protection

100% of South African rand investment amount on maturity, provided by Issuer.

The Index

The Index to which the Investment is linked is the BNP Paribas Multi-Asset Global Diversified Index (the 'Index'). The Index fact sheet can be found on our website or ask your financial adviser to provide you with a copy.

Underlying Performance Calculations

Initial Index Level

The level of the index on the investment start date at the valuation time as determined by the calculating agent, that is, BNP Paribas.

Final Index Level

The final index level will be the highest of any of the five annual recorded index levels, at Valuation Times as determined by the Calculation Agent. These dates will be available on the term sheet post trade and will be made available to investors upon request.

Index Performance (IP)

$$IP = (f-i)/i$$

Valuation Time

The time at which the official closing level of an index is calculated and published.

Final Redemption Amount (FRA)

Redemption Amount calculation

$$FRA = \text{Investment Amount} \times (100\% + PR \times IP)$$

PR means "Participation Rate"

IP means "Index Performance"

Example return scenarios

The return scenario below illustrates how the Investment would work based on an Investment Amount of R 100 000 after 5 years factoring a Participation Rate of 400% in the highest Index Performance on one of the five observation dates. These are for illustrative purposes only and are based on the assumption that no early withdrawals are made and are pre any tax implications.

Investment Amount	Highest Index Performance on one of the five Observation Dates	Participation Rate	Enhanced index performance	Enhanced Index returns	Investment Value at Maturity (Pre-tax)
R100 000	45%	400%	180.000%	R280000 = R100000 (45%*400%)	R291 250 = R100 000 + R191 250
R100 000	35%	400%	140.000%	R240000 = R100000 (35%*400%)	R248 750 = R100 000 + R148 750
R100 000	25%	400%	100.000%	R200000 = R100000 (25%*400%)	R206 250 = R100 000 + R106 250
R100 000	15%	400%	60.000%	R160000 = R100000 (15%*400%)	R163 750 = R100 000 + R63 750
R100 000	-10%	400%	0.000%	R100000 = R100000 (-10%*400%)	R100 000 = R100 000 + R0

Tax implications of the product

Generally speaking, the long term insurer is subject to tax on the growth and maturity of this policy. The tax incurred by the long term insurer will be deducted from the policyholder's investment before payout. A long term insurer is required to maintain five separate funds, of which four are liable for tax. Each of the four tax paying funds is subject to specific income tax and capital gains tax rates. Any amendment to the tax legislation relating to long term insurers may affect the surrender value or maturity value of this policy. Should this occur, Absa Life Limited will contact you. Please obtain your own tax advice, relevant to your circumstances, prior to investing.

Valuations, early redemptions and maturity

Please note that any early withdrawals (prior to the investment final maturity date) will be done at the prevailing market value of the Investment and any such early withdrawal could result in you losing some of your money. Only full withdrawals are permitted. Any investment proceeds due to you will be paid out to you by the Administrator within approximately seven business days.

Cooling-off period

You have a 37- (thirty seven) calendar day cooling-off period (the "Cooling-off Period") from investment start date in which to change your mind about your Investment. If you change your mind within this period, we will sell the instruments at market value and pay you this plus any financial adviser fees that have been included in the cost of the Investment. This value may be lower than your initial Investment Amount.

If you surrender your Investment after the Cooling-off Period, we will sell the instruments and pay you the current market value. This will be seen as an Early Redemption – see section above.
