

# CAUSEWAY DYNAMIC GROWTH FUND

FUND FACTSHEET - JANUARY 2026

## INVESTMENT OBJECTIVE

The Dynamic Growth Fund aims to generate an annualised net return of 8% to 9% (USD) over the medium to long term, with reduced sensitivity to equity market falls. The Fund will do so via an actively managed exposure to a portfolio of autocallable instruments linked to major equity indices. The instruments are backed by G7 Government Bonds, reducing counterparty bank risk.

For investors requiring a regular income, the Fund also has distributing share classes that pay out 5% p.a. (paid quarterly in USD or GBP), or 4% p.a. (paid quarterly in EUR) of the share class NAV.

# CAUSEWAY DYNAMIC GROWTH FUND

FUND FACTSHEET - JANUARY 2026

## KEY RISKS

This is a marketing communication. A comprehensive list of risk factors is detailed in the Risk Warnings Section of the Prospectus and the Supplement of the Fund and in the relevant key investor information document (KIID). A final investment decision should not be contemplated until the risks are fully considered. A copy of the English version of the Supplement, the Prospectus, and any other offering document and the KIID can be viewed at <https://causeway-securities.com/funds/causeway-defined-growth-fund/> and <https://www.geminicapital.ie/>. A summary of investor rights associated with an investment in the Fund is available in English at <https://www.geminicapital.ie/>.

A full list of fees and expenses associated with your investment can be found in the Fund Supplement under the section titled "Fees and Expenses".

Calculations do not consider credit spread movements of the issuers of the securities. The Mark to Market of the securities and therefore the NAV of the Fund will decrease as credit spreads widen and vice versa if spreads narrow. The value of investments and income from them can go down and you may get back less than originally invested. There is no guarantee that the Fund will achieve its objective.

The Fund invests in derivatives for investment purposes, for efficient portfolio management and/or to protect against exchange risks. Derivatives are highly sensitive to changes in the value of the asset from which their value is derived. A small movement in the value of the underlying asset can cause a large movement in the value of the derivative. This can increase the sizes of losses and gains, causing the value of a derivative investment to fluctuate and the Fund could lose more than the amount invested.

The Fund invests in high quality government bonds. All bonds will be rated at least A- by Standard and Poor's at outset. If any of the bonds the Fund owns suffer credit events the performance of the Fund could be adversely affected.

Other risks the Fund is exposed to include but are not limited to, credit and counterparty risk, possible changes in exchange rates, interest rates and inflation, changing expectations of future market volatility, changing expectations of equity market correlation and changing dividend expectations.

A decision may be taken at any time to terminate the arrangements for the marketing of the Fund in any jurisdiction in which it is currently being marketed. Shareholders in affected EEA Member State will be notified of any decision marketing arrangements in advance and will be provided the opportunity to redeem their shareholding in the Company free of any charges or deductions for at least 30 working days from the date of such notification.
